Job description About the company

About the role

You will build and maintain the store-level reporting that retail clients check every Monday morning — inventory turns, pricing performance, and shrink. Heavy SQL, some Python, and a lot of explaining numbers to non-technical stakeholders.

What you'll do

- Build reliable SQL reporting for inventory, pricing, and store performance.
- Turn messy retail data into clear dashboards and useful recommendations.
- Work with client teams to explain trends and improve weekly reporting.

Requirements

- 1+ years working with SQL in a professional setting (internships count)
- Comfortable explaining a number to someone who does not want the query
- Basic Python for data cleaning (pandas is enough)

What you can expect

A full-time role with a remote-friendly team, practical problems to solve, and ownership of reporting that gets used. You'll partner closely with analysts and retail operations teams.

Sound like your kind of work?

“Real problems, not busywork”

Current employee · Analyst
Chicago, IL · Sep 2026

The work is useful and the team is generous with feedback. You get to see how your analysis changes a client’s decisions. Reporting deadlines can make Mondays busy.

M Meridian Analytics

Data & analytics · Chicago, IL

18 matching reviews / 38 company-wide · Stronger sample

4.3	4.4	3.9	15 of 18
Your role / 5	Work-life / 5	Growth / 5	Flexibility works[1]

$85k–105k base / year · USD
Middle 50% · 14 shared salaries · not an employer pay band

“Useful work, with busy Mondays” — Sep 2026

Current employee · Data Analyst · Retail insights

Chicago, IL · 2 years tenure · Remote

Works well: Remote days are respected and analysts get direct access to client teams.

Trade-off: Weekly reporting deadlines can crowd out learning time.

Read 18 matching reviews → · 6 open jobs ↗

A Acme Corp

Technology · Chicago office

14 matching reviews / 124 company-wide · Directional sample

4.1	4.0	4.2	11 of 14
Your role / 5	Work-life / 5	Growth / 5	Flexibility works[1]

$95k–115k base / year · USD
Middle 50% · 9 shared salaries · not an employer pay band

“Real ownership, uneven priorities” — Oct 2026

Current employee · Data Analyst · Product analytics

Chicago, IL · 2 years tenure · Hybrid, 2 days in office

Works well: Strong mentorship and published pay bands for every analyst level.

Trade-off: Priorities shift quickly; hybrid days vary by manager.

Read 14 matching reviews → · 18 open jobs ↗

G Global Solutions LLC

Business services · US remote team

11 matching reviews / 67 company-wide · Directional sample

4.0	4.2	3.7	9 of 11
Your role / 5	Work-life / 5	Growth / 5	Flexibility works[1]

$88k–108k base / year · USD
Middle 50% · 7 shared salaries · not an employer pay band

“Flexible, but growth takes initiative” — Aug 2026

Former employee · Data Analyst · Operations

US remote · 3 years tenure · Remote

Works well: Flexible hours and a supportive team across time zones.

Trade-off: Promotion criteria could be clearer for individual contributors.

BEYOND THE STAR SCORE

Same company. Different experiences.

A company average can hide what it’s like on your team. Start with the role, then check the evidence.

MERIDIAN ANALYTICS

4.2	4.3
All 38 reviews	Your 18 matches

Different samples, not a change over time.

How much can I trust it?

15+ matches: stronger sample
10–14 matches: directional
Below 10: limited evidence

These are sample-size cues, not statistical confidence. Reviews are self-reported and may not represent every team.

[1] “Flexibility works” counts reviewers who say their remote or hybrid arrangement is respected in practice.

How we calculate insights →

TAKE IT TO THE INTERVIEW

Ask better questions.

“Who sets in-office days?”
“What earns the next promotion?”
“How are pay bands reviewed?”

Use recurring trade-offs to start a conversation, not make a verdict.

Fill in the picture.

Share your role, team and workplace experience. Your identity stays private.
